- This part-time, NFQ level 9 programme allows students to obtain a Masters degree or exit with a Graduate Diploma or Graduate Certificate if they do not wish to continue to Masters.
- Graduate Certificate students take three dementia-specific modules (30 credits) focusing on person-centred dementia care, therapeutic responses for people with dementia and dementia and everyday ethics. Graduate Diploma students take these three modules and a further 30 credits which focus on professional role development, leadership and collaboration, and research skills.
- Further to the above, Masters students complete a 30 credit research dissertation module, which includes advanced research learning.
